

MONASH ECOSYSTEM HUB PROFILE

1. Hub Name

Monash Innovation Labs (MiLabs)

2. Logo

3. About Us

Monash Innovation Labs (MiLabs) is a collaborative innovation space supporting research translation, prototyping and industry collaboration. It provides a multidisciplinary environment where researchers and businesses co-develop solutions.

4. Key Features & Capabilities

Prototyping labs, collaboration studios, meeting rooms, industry-engagement spaces, equipment for product development.

5. Signature Initiatives & Programs

Prototype development support, industry engagement programs, collaborative R&D, technical capability workshops.

6. Key Events You Deliver

Innovation showcases, R&D collaboration sessions, industry roundtables.

7. Industries & Sectors Supported

Advanced manufacturing, engineering, medtech, digital tech, materials science.

8. Who You Work With

Researchers, industry partners, startups, product developers.

9. Value Proposition to the Monash Precinct

Supports R&D translation, accelerates prototyping and strengthens university–industry connections across the precinct.

10. Current Opportunities for Collaboration

Shared research opportunities, joint prototyping, technical workshops, facility access.

11. Access or Membership Model

Application-based or partner-driven access; project-based engagement.
